

# Flat Keder

PVC / STANDARD

## Overview

The flat PVC keder, made from recycled PVC, is stitched onto printed fabrics and ensures the textile can be clamped into the aluminum profile and stretched into the frame. The scope of application for textile frames is very wide, such as: LED frames, stand constructions, retail and interiors.

|                                |                                                                                                                                                                                                                                                                                                                           |
